PLACEMENT REPORT

This report is an outline of placement and training activities that took place during the placement year 2021 - 2022. It comprises of the details of placement processes, pay scales offered by the companies, placement statistics and a detailed analysis of performance of students in comparison with the previous years.

PLACEMENT TEAM COMPOSITION

The Placement Team is student driven and consists of 31 students from across all departments: 23 UG Coordinators; 2 PG Coordinators; 6 Computing Dept. Coordinators.

PLACEMENT PROCEDURE

At the beginning of the placement year, a complete database of the final year students is collected and verified. A multitude of companies are analysed across parameters like reputation, pay scale, work life and are then invited according to the priority accorded.

The student database is shared with the company and the company is slotted based on the requirements of the company and the college. The placement drive is then coordinated and run by the placement team as per the schedule. Finally, student and HR feedback is collected and circulated among the final and pre-final year students to ensure improved performance.

Companies are categorized as non-dream and dream. Each student is permitted to avail 1 job offer from each of the two categories. Students can avail additional offers in the same category only after 75% of students get placed. This method has been adopted to ensure fairness and equal opportunity for all aspirants.

NATURE OF COMPANIES

The firms and industries that visit CIT cover a wide range of sectors like Software Developers, Software Service Providers, Telecom and Networking companies, E-Commerce companies, Core Production industries, Data Analytics and Market Research companies, Consultancy companies, Infrastructure Management and Maintenance Services companies.

INTERSHIPS AVAILED

M.Sc. (Software Systems, Data Science, Decision and Computing Sciences) and Master of Computer Applications courses mandate a 6-month internship program during their 10th and 6th semesters respectively. Majority of these internships are converted into job offers at the end of the internship program.

In addition to these some companies offer internships to UG students pursuing fast track program. PG students are also provided with 6-month internships by leading firms where they are permitted to pursue their project work.
