

Annual Report - 403 Strats

Event Conducted:

Event Name: 403 Strats Club Orientation & Quick Sketch Activity

Date: 24th January 2025

Time: 5:00 PM - 6:00 PM

Day: Friday

Venue: IT - 212

Number of Participants: 16

403 Strats hosted a special event for college club secretaries to introduce our new initiative at CIT. The event began with an engaging presentation outlining our club's mission to innovate across event management, competitive programming, and eSports.

After the introductory session, the energy shifted to a fun, interactive activity called "**Quick Sketch.**" In this game, teams of two were challenged to guess a prompt word based solely on their partner's rapid sketching. This activity sparked creativity and fostered teamwork among the attendees. The seamless blend of informative content with a light-hearted team exercise left everyone excited and optimistic about the future of 403 Strats and set a positive tone for our upcoming initiatives.

Upcoming Events:

1. **Rubik's Cube Solving Event** - A competitive and interactive event designed to challenge participants on their speed and problem-solving abilities with the classic Rubik's Cube.
2. **Workshop on Basics of Git** - A hands-on session aimed at helping students understand the fundamental concepts of Git, version control, and collaboration in software development.

We look forward to an exciting year ahead filled with innovative events and skill-building opportunities for our members.
