ABSTRACT:

This report is an in-plant training report submitted in partial fulfilment of requirements for the B.E. Civil engineering as per norms of Anna University.

The report consists of restudy and description of materials, procedure used at site for construction. The actual site conditions and actual problem faced at site has been analysed.

It consists of three phases in which the details have been incorporated and materials used are furnished.

The report consists of my practical experience in the field. All the contents are broadly explained, and it is constructed from the practical basis of the site in opening content I have given the details of all the things in the site.

I have explained the details of superstructure and substructure component that I have visited. It contains over all work that has been carried out during my in-plant period.

I have explained the details of the virtual internship in this report that has been carried out during my internship training.
